Milo News

Milo Man's Run Of Bad Luck

They say that things always happen in threes and it looks as if this is true in the case of Irvin Sukut at least. Two weeks ago it was reported that he had to go to the doctor to have an eye attended to, then last week he had a car accident and got in the news again. Now this week he again makes the news if not the headlines. He got off the tractor while combining to clean out the straw that had collected on the pick up. While prying with a crowbar to get the stuff loose he lost balance and fell on the pickup fingers, ramming one of them clear through his hand. That meant another trip to the doctor. Let's hope that he is about through getting into trouble for a while.

George Greaves of Calgary is at present staying at the home of his son Leslie Greaves while the harvesting is being done.

Mr. and Mrs. J. M. Thomson, their daughter Jean and Maxine Deitz have gone on a motor trip to Great Falls, Mont. Miss Thomson is on her holidays from the Banff Springs Hospital where she is employed as a nurse.

Another very bad accident occurred in the Milo district on Sunday when Walter Brautigan, an employee of the Bank of Nova Scotia, skidded on his motorcycle in the loose gravel at the corner by the old school. Jack Peterson was riding on the motorcycle also but escaped unhurt. However, Mr. Brautigan was not so lucky and was taken to the Vulcan hospital where he is suffering from internal injuries. At last report he was not yet off the critical list.

The Lutheran Ladies Aid is to be held on October 8th at the home of Mrs. Jack Deitz. Anyone in the community wishing to donate used clothing to needy people abroad are asked to bring it to the meeting or to drop it at Mrs. Deitz' home any time in the next month. The clothing is sent by the Lutheran Ladies Aid to a central point in Winnipeg where it is catalogued, sorted and packed for overseas. It is indeed a worthy cause and anyone so desiring to donate such clothing whether they be a member of this group or not are invited to do so.

Mrs. Joe Thomson Jr. is relieving at the Bank of Nova Scotia temporarily in the absence of Mr. Brautigan.

There was a fire alarm sent out over the phone this week and although the fire didn't amount to very much it certainly proved something to the people in that part of the country. In but a very few minutes after the alarm had gone out most of the west country had gathered at the scene of the blaze which was a minor one in the grass on the farm of Tommy Webber. However, it gave folks great satisfaction to know that if there ever was a great need for fire fighters the neighbors would turn out whether it was in the middle of harvest or not. Such is the co-operation that makes this community a good place in which to live.

Several children in the community have been on the sick list this past week but none of the sicknesses have developed into anything too serious as yet. Garry Umscheid was very ill with stomach flu and Terry Heather was also taken to the doctor. Both children are feeling better now and seem to be recovering rapidly as only children can. Miss Linda Page was taken to the Vulcan hospital on Saturday and confined there with an attack of appendicitis. She was operated on on Monday and at last report was coming along nicely. Miss Mary Kole was taken to the hospital last week when she was overcome by gas fumes in the school. Miss Kole has been staying with Mrs. Lewis Ivers and attending the Milo school.

The regular meeting of the F. W.U.A. was held at the home of Mrs. Viv Bertrand. In spite of harvest operations being in full swing there was a very good turnout and a very interesting meeting was held. It was decided to have a chicken supper if at all possible on October 11 in the Old Fellows Hall. It is hoped that harvest will be over by then, at least enough to make such a venture a success. Watch for posters giving all the information. A lovely flower show was held at which the members voted for the arrangements that they liked best. Mrs. Myrtle Monner had two of her bouquets tie for first place. The next meeting is to be held at the home of Mrs.

Maximum Loan is \$6,000

National Housing Loans Can Be Made In Vulcan

Encouragement for prospective home-builders in Vulcan to apply for loans under the National Housing Act was given at a meeting held in Vulcan last Thursday evening, attended by about thirty Vulcan residents and addressed by a Calgary representative of the Central Mortgage and Housing Corporation.

Maximum N.H.A. loan that could be secured was \$6,000 and the house must conform to N.H.A. standards of construction, the speaker said, but value of the

land

Henry. Miss Winnie Johnson accompanied by a girl friend, hitchhiked home from Edmonton for a few hours visit last week. Winnie is attending the Royal Alexandra Hospital in training for a nurse.

The big drag lines that have been working on the ditch all summer are moving on to Vauxhall. The work remaining will be done by the bulldozers and carryalls.

Duck season must be officially open at last if you can tell anything by the influx into the country of numerous men and women dressed in high topped boots, leather jackets and peaked caps. There are certainly a lot of strangers around now and a lot of strange cars cruising slowly up and down the roads. It is to be wondered if the opening of the duck season has had anything to do with the train being so late these last few weeks as it comes from the east. We have never had good train service on this line, but it is getting worse all the time and it can't be because they are bringing in so many grain cars. The train is supposed to get into Milo at ten thirty on Tuesday morning. Well two weeks ago it didn't get in until seven o'clock that night and last week it was midnight. Must be something down the line that is really interesting.

Dr. G. M. Carson of Calgary is spending some time in Milo visiting with his son and daughter-in-law, Mr. and Mrs. Charlie Carson. Rev. Clarke of Vulcan will conduct services at the Milo United Church on Sunday at 3 o'clock.

Did any of you see Evan Beechman trotting into the bank last week clutching his bank book tightly in his hand? Well, the reason for it was that at last someone had called his bluff and he had to start a bank account for a little newcomer in the district. He has told several people in the community that if they would name one of their offspring after him that he would start the baby's bank account and when Mr. and Mrs. Gilbert Voors were blessed with a son they named him Gordon Evan and Mr. Beechman proudly paid up.

Miss Joyce Dishaw last week gave up her dream of ever possessing the white cap and gown of a nurse and decided to enter this fall class in the field of home economics. She has successfully completed her first year of the three years course of nursing.

Our rural telephone lines could certainly do with a face lifting and several new miles of line have been put in by various farmers this summer and fall. Mrs. Doris Heather reported that Alf and George Heather and Bob Deitz built a new mile of line in their district and that they wished that some of the other neighbors would do the same so that they would have better service on the whole line. Then she added that they didn't do it because they were such upstanding citizens but that the power line had made them do it. However, it would still be a good idea if some work were done on the lines as the cross talk is sometimes so bad that you can't hear your party talk at all. After all, the farmers do own the line and it is in their interest to keep it up.

I was leafing through a battered old autograph album not long ago, the kind that every school child keeps and treasures with care, and in it I found some verses and quips that were both amusing and nostalgic. From time to time I will print one and hope that you will enjoy at least some of them, corny or not.

"Thou shalt not covet thy neighbor's wife,
His ox thou shalt not slaughter;
But thank the Lord He did not say
Thou shalt not squeeze his daughter."

land and value of the work the home-owner himself could put into the house would be considered part of the necessary down payment, thus reducing the amount of actual cash required by the home-builder.

N.H.A. loans would be given on one house or a dozen houses, he said, but suggested that considerable savings could be effected if several houses were to be built at the one time, with one contractor handling the construction.

Interest rate was now 5 1/2 per cent, he said, and loans could be spread over any period of time up to 25 years. Loans were fully payable after one year, without penalty, if desired. The average loan was for 15 or 20 years, with monthly payments taking care of principal, interest and taxes.

Blind Institute Plans Fund Drive

Did you walk away in God's good world today?

Did you look at beauty around you, the glorious color of the leaves, the bright blue of the sky, the flowers of the gardens, and the children going to school, clad like butterflies in bright red and blue, green and brown? Certainly you did; but did you know and stop to think that in Southern Alberta alone there are 600 men and women who live in perpetual darkness, who never see what we take for granted as a part of our everyday life.

Six hundred men and women who not only do not see the beauties of the world around them, but whose earning power depends on special training, special care. Did you know that not until after the first World War was there any form of organized assistance given to our Blind. That prior to that time the Blind were left to the charity of friends and relatives?

In 1918 Col. Baker of Toronto, himself blinded in action, formed the C.N.I.B. primarily to assist Canadian Soldiers, blinded in the war, to rehabilitate themselves and to become once more useful and independent citizens. Soon civilian blind too were accepted, and from this small beginning arose the C.N.I.B., now nation wide, with headquarters in Toronto, and the Dominion divided into four divisions, Alberta and B.C. being in the Western Division.

Each Division is headed by an Executive Officer. In the Western Division there are three such officers, one in B.C. and two in Alberta. One of the Alberta officers is Mr. R. V. Hewlett, in charge of the Central and Southern portion.

Mr. Hewlett, blinded in the last World War, is a person whom it is a pleasure and privilege to know, a cheerful and pleasant personality and so strongly imbued with his great ambition to make life worthwhile for all blind men and women in his territory that he entirely forgets his own handicap.

On Wednesday, Sept. 17, Mr. Hewlett met with a small group of the Executive of the Vulcan Branch of the C.N.I.B. and held them spellbound while he told them the story of the C.N.I.B. The C.N.I.B. is the only organization in Canada, authorized by Charter from the Dominion of Canada, and working with authority from the Public Contributions Act to solicit funds which are used solely to aid the Blind of Canada. These funds are not doled out in charity, but are used to educate and rehabilitate the Blind so that they can go out into the world and earn a living.

Isn't there a pension you say? Oh yes, there is. Forty dollars a month.

Can you live on forty dollars a month? Well it is possible forty dollars buys your cigarettes. Let it be said that Alberta and B.C. do supplement that with an extra ten dollars a month. But what about the man with a family? What about the women with children? Can they live on forty or fifty dollars a month?

Fifty per cent of the C.N.I.B. funds come out of Welfare Grants, such as Govt., Provincial, Municipal and Community Chests, the other 50 per cent must be raised by Public Contributions, and in Central and Southern Alberta, \$20,000 must be raised this year. It was with the object of helping

Thailand Fights Malaria With U.N. Help

Three years ago 60 to 70 per cent of the population of Chiangmai, in Northern Thailand, was affected by malaria. Since then, with the help of the U.N. World Health Organization (WHO), and the U.N. International Children's Emergency Fund (UNICEF), Thailand has largely succeeded in eliminating the "slow killer" in many parts of the country. Above, a Thai doctor uses a borrowed table from a nearby temple to examine a group of children of that region.

2,600 Farmers Interested

Study Insurance Against Crop Damage By Ducks

Insurance against crop damage by ducks and geese may be made available to Alberta farmers as the result of a survey made by the Alberta Fish and Game Association through the co-operation of the Alberta Hall Insurance Board.

The Fish and Game group considers the "scaring" policy instituted by the federal government and due to go into effect in 1953 to be totally inadequate. If a suitable form of insurance could be worked out, the Association feels that the farmers should not have to bear the full cost but that the federal and provincial governments should contribute.

The recent survey of Alberta farmers was made by the Alberta Hall Insurance Board through the co-operation of its 475 agents in 350 villages and towns in the province. Nineteen thousand circulars were sent out asking the question: "If a plan of insurance were to be instituted to cover crop damage caused by migratory birds, would you be interested in placing such insurance on your crops?"

The returns of the survey carried out in June, July and August showed 9,000 replies sent in, with 2,600 in favor of such a scheme.

According to Alberta Fish and Game Association officials "the returns on the survey indicate that while the large percentage of farmers are not interested, there still is a goodly number who are. Whether there are enough interested in such a plan to make it a success will be investigated and considered at a later date by the board."

It is felt that if such a plan was considered feasible it could be instituted and carried out by the board. Also, being a co-operative organization, controlled and directed by the farmers, it would at all times work in the best interests of the farmers at the lowest possible cost.

Damage to the crops this year has not been as extensive as expected, but the threat still exists until the crops have been threshed, especially if cool, wet weather slows up the harvest until the northern birds start their flight south. It is these large, grain-feeding mallards and pintails which cause the greatest damage.

In this great humanitarian work that the Vulcan Branch of the C.N.I.B. was formed, and to belong to such an organization is indeed something to be proud of. To know and to work with men like Danny Waddington and R. V. Hewlett is a privilege, not a chore.

When the C.N.I.B. worker calls at your door next month, think what it would mean were you never to see the light of day again, and give accordingly.

The two great inland waterways of the Canadian Northwest are the Mackenzie and the Yukon, both of which rank among the 10 greatest river systems in the world.

Most Wheat Grading No. 2

Harvest Soon Finished If Fine Weather Holds

Scattered showers over the district last Friday held up harvesting operations for a day or two, but since Sunday combining has again been in full swing, with ideal weather conditions prevailing.

This week has seen clear skies and temperatures around 75 to 80 above and farmers have been taking advantage of every possible working hour to get the big crop safely harvested and binned. Harvest yields are again in the east country, ranging from 20 bushels on stubble to 45 and 50 on summerfallow. West of town, yields will average about 30 bushels per acre. Practically all wheat so far delivered to local elevators is grading No. 2 Northern.

An improvement in the wheat shipping situation is noted, with district elevators recently receiving good numbers of empty cars for loading. The five-bushel delivery quota and shortage of elevator space is straining farm storage facilities and it is hoped that it will be possible to raise the delivery quota in the very near future.

The absence of prolonged spells of wet weather so far this fall has also considerably reduced anticipated duck damage. Swathed fields are being rapidly combined and hunters have been out in large numbers to keep the birds on the move. If the fine weather continues for another week, the bulk of the crop will have been safely harvested before the arrival of the large flocks of northern mallards which did such extensive damage last year.

Given another week of good weather harvest will be pretty well cleaned up except for late-sown fields.

Prairie Fires In East District

That the hazard of prairie or stubble fires is always present during dry weather in the fall was shown twice this week.

A rubbish fire back of the Reid Hill school spread beyond control on Sunday and swept across a pasture, gaining in size until it was a quarter-mile in width. The fire reached the first swath in one of Carson McKay's fields before it was brought under control and eventually put out through the efforts of the farmers of the district who were summoned to the scene through the co-operation of the Vulcan telephone operators.

Had the progress of the fire not been halted when it was, much of the heavy, swathed wheat in its path could have been lost.

On Monday a spark from a truck set off another prairie fire, this time on the Tom Webber Jr. farm. With the assistance of neighbors of the district, called by the Milo telephone operator, the fire was soon brought under control with only a few acres of pasture land being burned.

Brant Students Elect Officers

At the term's first meeting of the Brant Students' Union, officers for the current term were elected as follows:

Shirley Kennedy, president; Ken Auld, vice-president; Elizabeth Druhal, secretary-treasurer; Margaret Ann Collison, social convener; Bob Sellers, sports reporter; Joe Druhal and Jack McFadden, press reporters.

Wins Grade 9 Scholarship

A resident of the County of Vulcan, who has been attending the Nanton Consolidated School, Lillian Olive White, has been awarded the 1951-52 Grade 9 Scholarship of the Nanton Home and School Association. She is the fourteen-year-old daughter of Mr. and Mrs. James T. White, who reside west of Vulcan.

When presented with her scholarship cheque, Lillian also received a lovely bouquet of American Beauty roses. The presentation took place in the Nanton Community Centre on Wednesday, Sept. 17.

District Pioneer Dies At Vancouver

Wilhelmina Louise Kothlow (widow of the late Frank Kothlow Sr.) passed away at the home of her daughter, Mrs. G. L. Johanson of Vancouver, B.C., Aug. 8, 1952. She was in her 87th year.

Born in Germany, she came to Canada in 1894. In 1906 she came with her husband and family to the Vulcan district where they homesteaded five miles north and east of Vulcan. In 1926 they moved to Vancouver, B.C., and in 1938 Mr. Kothlow passed away in that city.

She is survived by three daughters, (Emma) Mrs. G. L. Johanson, Vancouver; (Minnie) Mrs. L. L. Hanson, Calgary; (Elsie) Mrs. Harry Phillips, Langley Prairie, two sons, Charles of Vancouver and Arthur of Everett, Wash.; 29 grandchildren; 44 great-grandchildren; nine great-great-grandchildren; two brothers, August Klingbiel of Ontario and Frank Klingbiel of Chicago.

Funeral services were held on Thursday, Sept. 11, and interment was made in Forest Lawn Memorial Park, Vancouver.

Escape Injury In Car Accident

Five local girls had a narrow escape from serious injury Sunday evening when the car in which they were travelling turned over and was completely wrecked.

According to reports, the driver, Marilyn Seales, averted the car to avoid a turkey crossing the highway and hit some loose gravel. The car rolled over two or three times before coming to a stop. Miss Seales and her passengers, Marlene Lloyd, Ruth and Helen Nicol and Beth Saxby, were taken to the Vulcan hospital but none required hospitalization.

The girls were enroute to Carmangay to visit friends when the accident occurred.

SERVICE BOARD NOTES

Vaccination to prevent disease is an accepted practice in both human and veterinary medicine. With cattle vaccination against blackleg has saved thousands of head. Calhoo vaccination against Bang's disease has proven very effective in Alberta in reducing losses in infected herds and preventing losses in clean herds.

The vaccination of heifer calves from 4-9 months of age gives them a good resistance so that mature, they will not lose their calves prematurely. At least on hundreds of thousands of calves vaccinated in Canada and the United States vaccination has proven to be about 95 per cent effective in preventing such losses. Over a period of 4-6 years, a complete herd resistance can be built up.

As the vaccinated heifers mature and go as herd replacements into the beef or dairy herd, cinder cows that are infected with Bang's disease should be sold for slaughter. In this way, a cattleman will be able to practically eliminate the disease in a few years. That has been done at the University of Alberta, and by ranchers and dairymen in the province. Although good herd management has to be practised at all times to get the best results.

Calhoo vaccination has proven effective, economical and practical. It should be practised in clean herds as well as infected ones. Start building up a Bang's resistant herd now! Protect your income and health of your family. Remember the disease can cause undulant fever in humans.

Contact our office at the County Office for listing your heifer calves, we also have a bulletin on the disease prepared by the Dept. of Agriculture. They very strongly recommend vaccination, coupled with good herd management as an economical and practical way to prevent and control the disease.

The co-operation of all cattlemen will be greatly appreciated in building up Bang's resistant herds by having all heifer calves vaccinated this fall.

High Freight Rates

(Farm and Ranch Review)

Freight rates, since the war, have risen now by around 90 per cent. For the producer and consumers of this country, nothing is as inflationary as increases in railway wages that result automatically in increased freight rates. When auto workers, or textile workers get increases that cause higher prices, we can dodge them by driving our old car or wearing our old clothes. But we can no more avoid paying the railway employees their increases than we can avoid death or taxes. We cannot do so because if railway wages go on being raised railway freight rates must go on increasing. But like everybody else on the prairies, we don't think the railways should get their money by the flat increase system.

The damage, to us, of the flat increase is that it unfairly increases the cost of the long haul shipper because the long hauls are charged the highest rates.

Yet, regardless of how burden is placed, far too much of it comes to rest on the shoulders of the people of the West and the Maritimes who are at the end of the line.

Hands Off

It has taken a long time to learn that the problems of the farm industry are economic and not political. Henry Ford claimed that the kind of government we have does not make much difference. He said that the industrial world, the farm world, provides the engines of progress and all that a government can do is to see that the engine of production is allowed to work under the best conditions.

The farmers of Alberta and of Canada have equipped their farms for only one purpose, that of production, and the least that a government can do is to let them produce. All directives to have them curtail production in one phase of farming or another are only obstructive. The farmer himself knows best how to obtain a balanced economy and government directives have proven misleading time after time. The history of agriculture, with all its ups and downs, has shown that if the farmers are to share in the advantages of the machine age, as is their natural right, they can obtain their share only by producing more and better wheat, more and better cattle, more and better dairy products, insofar as their farms are equipped for any one or all of these purposes. —Stettler Independent.

Low Protein

(Lethbridge Herald)

Announcement by Dr. J. A. Anderson, chief chemist of the Board of Grain Commissioners, that this year's record wheat crop is one of the three lowest in protein content in the past 24 years, is disturbing news.

For some years past Canadian millers have been worrying because of a progressive lowering of the protein content of Western Canada's wheat. They have been asking why. Dr. Archibald, who has retired as director of Experimental Farms, suggested on more than one occasion that Western Canada's wheat land, which has been growing wheat for 40 to 50 years, is losing some of its fertility. Dr. Anderson says that nitrogen must get to the wheat kernels as the heads form in order to build up protein content to the percentage that the millers like.

It would appear that we should sow less acres to wheat, take some land out of production and proceed to build up its fertility. That can be done by growing clovers and grasses and by using nitrogenous and other artificial fertilizers. Barnyard manure is another way to restore fertility but in this mechanized age of farming little of that is produced any more.

Farmers should take seriously the news of the lowering protein content of our wheat—the West's big gest cash crop. They should not rest until they have found a way to restore plant food and bacterial action in their soil which will put our wheat up once more on the pedestal it used to occupy in the minds of the world's bread-eaters.

A character named Dide Libbey mistrusted everybody. He presented a \$25 cheque to be cashed at the bank one day, and watched sharply as the teller counted out four fives and five ones. Then he picked up the bills and counted them over again, very carefully. "Did I give you enough?" the teller enquired sarcastically. Dide glared at him. "Just barely," he said, "just barely."

CARD OF THANKS
We wish to extend a sincere thanks to our many friends for their help, floral tributes and expressions of sympathy when we lost Mark Henry.
lp —Ole, Edith, Judy and Ward Willard.

CARD OF THANKS
I wish to express my sincere thanks to my many friends in Vulcan and district, and especially my former classmates at Reid Hill, for the flowers and many acts of kindness during my illness in hospital.
lc —Mrs. Norma O'Hare

CARD OF THANKS
I would like to take this opportunity to thank the many friends who remembered me while I was in the hospital. The cards gifts and flowers were very much appreciated.
lc —Mrs. Margaret Richardson

CARD OF THANKS
We wish to express our sincere thanks to all those who turned out to fight the fire at our farm on Monday. We also wish to especially thank Mr. and Mrs. A. W. Will and family and Mr. Evan Beechman for their prompt action in notifying us and getting help.
lc —Mr. and Mrs. T. B. Webber Jr.

CARD OF THANKS
I would like to take the opportunity to kindly thank all the friends and neighbors who so willingly turned out to help fight the fire on Sunday, and also thank the telephone operator for her splendid co-operation.
lp —CARSON McKay.

IN MEMORIAM
HANSELL—In loving memory of my son, Harry Ernest Hansell, who was killed in flight over Germany, Sept. 26, 1944.
"My son, my son."
—E. G. Hansell and family.

IN MEMORIAM
HILZ—In loving memory of our baby daughter, Terry Jane, who passed away Sept. 26, 1951.
"God knows how much we miss her,
Never shall her memory fade,
Loving thoughts shall ever wander
To the spot where she is laid."
—Ever remembered by her Mother and Daddy.

With The District Agriculturist Hugh Michael

Recommendations for Poultry House Plans.

The following are recommendations made by the Poultry Branch of the Department of Agriculture concerning the construction of a poultry house.

Plans should be designed to give a maximum of space with a minimum of cost. A square building is desirable for two reasons. First it is easier to ventilate and keep dry, and secondly it gives more floor space per foot of wall than a rectangular building. For example a 30' x 30' building has the same floor space as a 20' x 45' building, but has 10' less wall.

The foundation should be concrete and heavy enough to carry the building without cracking. Blocks to carry the support for the centre of the building should be poured when the foundation is run.

Permanent floors of concrete or wood are easy to keep clean. Gravel six to eight inches deep is satisfactory if deep litter is to be used. Recommended floor space is three square feet per Leghorn hen and 3½ for the heavy breeds. With pens larger than 20' x 20', floor space per bird may be reduced slightly, if the pen is smaller, it should be increased. Overcrowding causes dampness, feather pulling and often results in sickness.

If windows are not placed on the south side, temperatures should be more uniform. Storm sashes are recommended during the winter months. For every twenty square feet of floor space there should be one square foot of glass.

Shavings are satisfactory for insulation providing a six inch studding is used. A vapour barrier paper should be used between the studdings and the inside wall to keep the insulation dry.

Air inlets should be provided on three sides to give the necessary ventilation and to get away from direct winds. An outside cap should be used on the inlet so the air does not enter directly through the wall. The inside door can be hinged at the bottom in order to direct the flow of air to the ceiling for circulation. The air outlet may be used to support the ceiling and consists of shaft from the floor to the top of the roof. Insulation around the air outlet

is necessary from the ceiling to the roof, the outlet should be open above the roof except for the corner posts. If a cap over the outlet is used, a flat ceiling inside the cap gives the best results. The size of the outlet varies from 2 to 3 square feet depending on the size of the building. Sliding doors on the north and south side at floor level are used to control the flow of used air.

Wherever birth statistics have been collected in Canada, they show an excess of males. Lucky girls!

Canadian women over the age of 15 used an average of 8.4 pairs of full-fashioned hosiery during

Striped bass have long frequented Nova Scotia's Cobequid Bay.

Harvest Specials -

1948 John Deere 16 ft. Pull Type Combine with motor and pickup. Completely reconditioned, ready for the field.

1947 Massey-Harris No. 17 pull type P.T.O. COMBINE with reclaimer and unloader auger. Tires good. Very little repairing and is ready for work.

ROBIN GRAIN LOADER, 16 ft., complete with power shaft and joints, used very little, priced right.

**"I put away my
hard-earned money"**

This young bank depositor recently wrote to his bank manager:

"I made a goal of \$1,000 for this year. It is two years since I opened the account with two dollars. I owe thanks to you that I put away my hard-earned money where it will benefit me... I do not wish to touch it for the time being."

Building up a bank account means work and sacrifice. But Canadians know the value of having savings handy in time of opportunity or need: they maintain 7½ million savings accounts in the chartered banks—almost twice as many as ten years ago. At the same time bank staffs have almost doubled. That, and higher wages, have increased bank payrolls almost three times.

More people use the banks, more people work for the banks than ever before.

This advertisement, based on an actual letter, is presented here by

Miss Gloria Fraser has returned to Calgary after spending a short holiday at her home here. She will attend University of Alberta, Calgary Branch.

Mr. and Mrs. Oscar Hagg left this week for Nova Scotia where they will spend a two months' holiday visiting with their son and daughter-in-law, Flying Officer Larry Hagg and Mrs. Hagg.

Mr. and Mrs. Dwight Tuttle and family of Kimberley, B.C., Mrs. Charlie Craig of Cayley, and Mr. and Mrs. Chauncey Tuttle of Armada were weekend visitors in town at the homes of Mr. and Mrs. Gordon Stewart and Mr. and Mrs. Robert Stewart.

Mr. and Mrs. H. Allen and Lorne of Calgary spent the weekend in town visiting with friends.

Miss Marion Lebsack spent the weekend with her parents, Mr. and Mrs. Charlie Lebsack.

Twenty-two children registered in the Grade One Class in the Champion Public School at the beginning of this term.

Mr. and Mrs. Myers are visiting at the home of Mr. Myers' cousin, Mrs. Davey Casey.

Mrs. Ed Moses and small daughter have returned to their home in Calgary after spending several days visiting at the home of Mr. and Mrs. George Moses.

Bruce McNamee and Hubert Bessette spent the weekend at Cayley, visiting at the home of Mr. McNamee's parents.

Mr. and Mrs. D. Stewart and small son and Miss Margaret Miller, all of Lethbridge spent the weekend at the home of Mr. and Mrs. Cliff Miller.

The September meeting of the

Women's Institute was held at the home of Mrs. M. Stason, with a small attendance due to harvesting operations. Mrs. Gilbert presided at the meeting. A very short business meeting followed. Mrs. Ed Knudson, on behalf of the organization, presented Mrs. Gilbert, who is leaving this district shortly, with a gift of silver. The raffle prize, donated by Mrs. Miller, was won by Mrs. Hoyt. A very delicious lunch was served by the hostess assisted by Mrs. Gilbert.

Eddie Barry left on Friday for Edmonton, where he has enrolled in the University of Alberta.

Mrs. Arthur Hopkins is in the district visiting friends and relatives.

Mrs. Mona Boner, of California, is visiting relatives and friends in the district.

Mrs. Wm. Christensen has returned home after spending several days in Calgary.

Mr. and Mrs. Carleton Mellett were Calgary visitors last week.

Friends of Mr. and Mrs. M. Bakken will be interested to know they are the proud parents of a baby boy, Howard Martin, born in the Vulcan Hospital.

Mrs. Bulman is a patient in the Vulcan hospital.

Mrs. Root of Coleman was in town for a short time visiting at the home of her son-in-law and daughter, Mr. and Mrs. Clarence Rhodes.

Mr. and Mrs. J. C. Atkinson of Hillcrest were weekend visitors at the home of Mr. and Mrs. Clarence Rhodes.

Mrs. Bessie Siler was a Calgary visitor last week.

Operating Adjustments Means Better Combine Results

Your combine is no better than the man operating it, says C. A. Cheshire, Agricultural Engineer for the Alberta Department of Agriculture. It has been overhauled and is in tip-top shape, but it must be adjusted into operation. The combine consist of four operating units, the cutting and conveying section (conveying only, where a swather is used), the threshing unit, the separating portion and the cleaning unit. Each of these parts must be adjusted properly or reduced quality and quantity of grain will result.

Your combine operator should be able to read. If he cannot read, then read it to him. The best guide to combine operation is the operation manual supplied with your machine. Read it carefully and follow directions.

Adjust your combine methodically. Start with the power unit. Take the r.p.m. of either the tractor or mounted engine, depending on whether it is a power take-off unit or not, and adjust for an idle speed of 15 to 20 r.p.m. faster than recommended operating speed. Next take the speed of the cylinder, beaters, straw rack, and fan with a speed indicator (a tachometer is not accurate enough) and adjust to the proper speed, as shown in the instruction manual, for that crop and condition.

After getting the correct speed of these parts of the machine keep them right by preventing overloading. Take a minimum of straw through the machine—in most cases this is a swather adjustment—and next cut down ground speed, especially where the crop or swath is heavy or weedy.

Next check the cylinder. See that the clearance between cylinder and concaves is the same at both ends and that none of the bars are bent or excessively worn. Thresh the grain without breaking the straw excessively and this means wide cylinder concave spacing and low cylinder speeds. Don't try to thresh out every kernel.

Overthreshing is one of our most common combine faults.

Finally check the separating and cleaning action of the machine. If the straw walkers are not doing their job properly it means the combine is either overloaded or the crop is being overthreshed and ground speed adjustment or cylinder adjustment should be made. The wind should be directed well forward on the shoe, strong enough to "float" the chaff over the sieve, but not strong enough to blast the grain out the back. Next the sieves should be opened to a point where chaff starts to come through with the grain, and then closed one notch.

There is just one more point to remember. You have to make some of these changes in your combine setting for every crop, for every field, and for every change in weather. Wheat settings are not good enough for barley. Speed and adjustments that are correct for the hottest part of the day will almost certainly be incorrect in the evening and morning. So you have to learn to make the necessary changes quickly and accurately, or take the loss which results from poor adjustment.

Full-time enrolment of undergraduates in Canadian universities and colleges in the academic year of 1951 was about 72,000, a 10 per cent decrease from the previous year.

Holberg, B.C. is a town built completely on rafts. It is composed of homes for lumberjacks.

WE MUST BE TRAINED AND READY TO DEFEND

Every patriotic Canadian is ready to pick up arms to defend this country if we are attacked.

BUT... patriotism and courage are not enough. Training is essential for effective service in our defence forces. In time of crisis our modern Canadian Army can use men who know how to handle today's complex weapons.

If you are not serving in Canada's Active Forces, you may obtain this training in the Reserve Force.

- You will learn how to defend your home — Canada.
- You will achieve new physical fitness.
- You will receive full Active Force rates of pay for training time.
- You will be fulfilling your duty to your community and Canada by being trained and ready to defend should the need arise.

There are many opportunities in Canada's growing Reserve Army for promotion. Every trade and profession of civilian life is needed immediately.

**Apply to any Regiment or Corps you wish —
but do it NOW!**

SERVE YOUR COUNTRY AND YOURSELF

JOIN THE RESERVE FORCE NOW!

THE SIGN THAT SAYS MORE FOR YOUR MONEY

Canada Declared Free Of Foot and Mouth Disease

Canada was officially declared free of Foot and Mouth Disease Aug. 19 by Rt. Hon. James G. Gardiner, Federal Minister of Agriculture. All restrictions on the movement of livestock throughout Canada and all precautionary measures against the spread of the disease in Southern Saskatchewan have been removed. This action does not in any way change present floor price policies for livestock.

No sign of the disease has been uncovered since May 4 when the last infected herd was slaughtered. Test animals (calves and hogs) have been on all infected and contact premises for 60 days or more and none has shown evidence of the disease.

This official action removes all quarantines and restrictive measures, including individual quarantine of former infected or contact premises, and the general quarantine applicable to the infected area and buffer zone. Provincial restrictions imposed as a result of the outbreak have been removed.

Since the disease was diagnosed on February 25, 1943 cattle, 294 swine and 97 sheep have been slaughtered. There was a total of 42 premises involved by the outbreak, 29 of which were infected premises and 13 were contact premises.

The Quarantine Area involved only 21 rural municipalities of the well over 580 rural municipalities in Saskatchewan. Active infection occurred in 5 of the 21 municipalities.

Bounties Offered For Cougars, Wolves

Bounties have been placed on two of Alberta's worst predators—timber wolves and cougars—in an attempt to halt their attacks on livestock and big game.

Residents of Alberta may collect a \$15 bounty on cougars killed within the Province, exclusive of national parks, during the fiscal year ending March 31st, 1953.

The bounties on timber wolves have been divided into two classes. From April 1st to September 30th, a \$15 bounty will be paid for every timber wolf or pup killed in Alberta, outside of national parks. From October 1st to March 31st, 1953, when the pelt will be more valuable to the trapper, the bounty will be \$12.

When a pelt is delivered to a game or forest officer, R.C.M.P., Justice of the peace or a commissioner of oaths, both ears are split from tip to base and the pelt returned to the applicant. Both ears must be intact on a pelt for which bounty is claimed.

In addition, information as to the time and the place of trapping or killing also is required. Licensed fur buyers are restricted from collecting these bounties.

Open Letter to Parents

Vulcan Alberta.
Sept. 9, 1952.

Dear Parents:

The time has come when once again you will outfit your children in those styles that young Canadians are wearing and send them off to school. Now the question arises, will you merely leave a sigh of relief that you have them off your hands, and leave the rest to the teachers and the Department of Education, or will you fulfill the further duties of a parent and make yourself fully familiar with what your children are being taught and how it is being taught. The boys and girls of today will be the men and women who will guide the affairs of the world tomorrow. Therefore it is every parents' duty to do his best to see that the youth of today are educated to adequately take their places in the future.

In this town there is a Home and School Association, or a group that bears that title. The Home and School Association is dedicated to the furtherance of Education, and as the group has grown so large over the past few years, their views, when presented to the Department of Education, bears a good deal of weight. So the logical thing to do if you are interested in the education of your own children is to become associated with the Home and School, and through them learn what is being taught and how it is being presented. If you are not satisfied, the local association can present resolutions to the Federation of Home and Schools who in turn petition the government to make desired changes, and many improvements have come through these channels.

However, to be more specific and discuss the problem as it exists locally. Are the parents of the Vulcan district interested in Education? It would hardly seem so, when in a school with an enrollment of over 300 students, the Vulcan Home and School Association boasts a membership of 15. It is a deplorable situation. The Home and School is not supposed to raise money, or buy drapes for the school windows, etc. It is meant to be a group of parents and others interested in education who meet together to discuss problems of education. There are great quantities of literature available free for groups who wish to make a study of any phase of Education in our schools today. Many speakers are available as well as educational films, which would explain what is being done along educational lines today. But the problem that faces us today is utter lack of interest. It would be a fine thing to bring a speaker from Calgary to Vulcan—the county seat of Vulcan County—and have them face an audience of not more than 20 people. We blush with shame to admit that such a condition exists. What we need is parents who come interested in learning about the schools and things that are being taught, not someone coming looking to be entertained. If we as parents and citizens of this country are to do our share to help make the world of tomorrow a better place in which to live, what better way can we do it than to see to it that our children are educated to handle affairs well.

Parents! What will it be this year? Will you attend the Home and School Association meetings and lend your support to improving Education? Or will you rest up on Home and School nights so you can go Square Dancing the next night?

Yours for the Best in Education,
"Interested"

Protect Vegetables From Wind Damage

Observations have been made during the last two years on the effect of strong westerly winds upon vegetable crops grown on light soil in exposed locations. Nearly all of the crops observed were seriously injured by the wind and blowing sand. Snow fences were erected in an effort to decrease the wind velocity. These were found to be effective and damage was much less where the snow fences provided protection.

These observations indicate the need for protecting many of the more intensive crops (tomatoes, beans, cucumbers, etc.) from the effects of the strong winds, particularly on light soils which are considered to be ideal for growing these heat-loving crops. Snow fences, at regular intervals across a field, would be helpful, although considerable labor is involved each year in erecting and dismantling them. Hedge rows, running north and south, at intervals, would provide permanent protection from westerly winds. For the grower, who is interested in producing the crops mentioned, it would be profitable to set up a series of plots, protected by hedges, in which a satisfactory rotation of the crops could be initiated. The hedges, too, would serve to trap snow and, in that way improve spring moisture conditions.

Common caragana, because of its hardiness, would probably be the most satisfactory of the hedging plants available for this purpose. Any interested growers are requested to write to the Experimental Station, Lethbridge, Alberta.

Only a rich man ... can afford poor heating!

Our heating department will be glad to survey your heating requirements

LLOYD'S JEWELRY

Carmangay

The monthly meeting of the S. C.W.A. was held at the home of Mrs. Sadie Robertson recently with nine members and one visitor present.

Discussion of the fall bazaar was the feature part of the afternoon and it was decided it will be held in the Town Office Nov. 1st.

A present of a cup and saucer was presented to one of the members who will be leaving soon, Mrs. Sibley. She thanked the Club very graciously, and stated she regretted leaving the many friends she had the pleasure of meeting in the few years she had spent in Carmangay.

The raffle was won by Mrs. Rena Burns, after which the hostess, Mrs. Robertson served a lovely lunch. Notice will be given of the next meeting.

School Class Donates to Red Cross
During the school term last year, Mrs. Vilda Shear's class, Grades 4 and 5 of the Carmangay school, donated \$165 to the Red Cross.

There were 38 little eager beavers in the class, with Gordon Milliken as president, Marilyn Smith as secretary and Barry Greene as treasurer.

Proceeds from this donation were made possible by holding a bazaar and bake sale in June, making and selling popcorn and doughnuts at programs and dances, collecting empty bottles, donations by the class individuals, and pound and fine money in the class room.

The class sent their proceeds to the Crippled Children's Hospital in Calgary and also donated \$10.00 towards sending two local High School students to the annual Red Cross Convention in Jasper.

During this very busy season with all the hubbub of trucks hauling grain, farmers making a quick trip to town for that much needed repair they don't have too much time to look around for small children that seem to choose the road to play on. Of course, we all know there is a speed limit in town, especially near the school yard, but sometimes it is overlooked during the rush season. However, with the full co-operation of the parents and the busy farmers and grainhaulers we hope that our town will be accident free this time of the year.

Miss Audrey Burns, oldest daughter of Mr. and Mrs. Roy Burns, left recently to attend the Faculty of Education, the Calgary Branch of the University of Alberta.

Percy Vojt of Los Angeles accompanied by Mrs. Gus Greene were Monday visitors at the home

of Mrs. Thelma Lund. Percy is on a surveying trip to St. John, B.C. Irl Miller, eldest son of Mr. and Mrs. Wallace Miller, left Monday for Edmonton where he will take his B.Sc. in agriculture.

Little Miss Wendy Twedt is in Calgary spending a few days with her grandparents, Mr. and Mrs. Alec McDowell.

Mrs. H. A. Frank has just returned home after spending a three month holiday in Michigan visiting relatives.

Mrs. A. Lund was a Calgary visitor last weekend.

Rita Smith is a patient in the local hospital recovering from an appendicitis operation.

Mr. and Mrs. Herman Stettner of Namaka were recent guests at the home of Mr. and Mrs. Ed Stettner.

Mrs. A. Wynn spent a few days in Calgary recently.

Mrs. C. Hovde of Vancouver is visiting at the homes of her son and daughters.

UPLAND GAME HUNTING SEASON OCT. 4 - NOV. 15 FOR MOST BIRDS

The open season on most upland game in Alberta this year will be from October 4 to November 15. The only exception is blue grouse which may be hunted from September 1 to September 30. Bag limit on this bird is five per day and 25 for the season.

Prairie chicken, ruffed grouse, spruce partridge, Hungarian partridge and ring-necked pheasants all are eligible upland game during the October 4-November 15 season. The bag limit on all but the pheasants is 10 per day and 50 for the whole season. Ring-necked cock pheasants are limited to three per day and 18 for the season.

It is illegal to hunt pheasants between one-half hour after sunset and 10 o'clock in the morning, and as in past years, the hunting of game on Sundays is illegal.

Sockeye Salmon Planted In Southern Alberta

Alberta sportsmen may someday enjoy the thrills of fishing for sockeye salmon within the boundaries of their own Province if an experiment currently underway at the St. Mary Reservoir in southern Alberta is successful.

For the first time, salt water salmon have been planted in Alberta fresh water by the Fisheries Branch of the Department of Lands and Forests.

The planting took place July 21 when 80,000 sockeye salmon fingerlings hatched in the Provincial Government Fish Hatchery at Calgary were piped into the St. Mary Reservoir from the metal tanks in which they had been brought from Calgary.

The salmon planting project was initiated by the Fisheries Branch of the Department of Lands and Forests after surveys had been made.

Last April, the fish hatchery at Calgary received approximately 90,000 sockeye eggs from the Montana State Fisheries Branch. These eggs were developed to the fingerling stage at the Calgary hatchery and then planted directly in the southern Alberta reservoir, instead of allowing them to mature at a rearing station.

Under the favorable water conditions of the reservoir, the salmon fingerlings are expected to survive without difficulty, but regular tests will be made on their ability to survive in fresh water by field biologists.

The sockeye salmon of the Pacific Ocean lives most of its life in salt water and enters fresh water only to spawn and die. The Fisheries Branch feels that the salmon, although a salt water fish, can adapt itself to fresh water and survive. However, salmon raised in fresh water will not grow so large as their salt water relatives.

If the salmon experiment is successful, more sockeye salmon will be planted in other Alberta lakes. This winter, approximately 10,000 salmon fingerlings will undergo further examination at the Calgary fish hatchery to determine whether their species will someday provide a major attraction for Alberta fishermen.

Naphthalene is mined in the Peterborough area of Ontario. Most of it is shipped to Belgium for fine glass-making.

How to put wheels on a Wish

"It's Simple When You Know How."
And by a coincidence, that's the title of the Commerce booklet telling women the whys and hows of day to day banking. Get your copy at your branch of The Commerce today.

When you know and understand how to bank efficiently, then the thought of Savings becomes second nature to you. You can put wheels on your wish, whether it's a vacation trip next year, or a bicycle, or even a car... if you get into the important habit of saving. You'll discover that just a little each week builds up surprisingly.

It's simple when you know how!

District News

ARROWWOOD

The family of Clate Williams gathered at his home two weeks ago, in honor of Mr. Williams' 60 birthday.

Mr. and Mrs. Gordon Campbell are visiting with Mrs. B. Simmie for a few days.

Mr. and Mrs. Eddy Cameron and family are visiting with Eddy's relations at Wainwright.

Elvira Hoerle spent a few days in Vulcan hospital last week.

A surprise party was held Monday at the home of F. Hall in honor of Mrs. Hall's birthday. A number of ladies attended and all reported a good time.

Mr. and Mrs. Dan Janzen of Salmon Arm, B.C. visited at the home of Mr. and Mrs. R. Culp, and also spent a few days at Gen.

A number of Arrowwood young people left Monday for Cluny, where they will attend school. These were: Ronny Hayes, Harold DeWitt and Duane Norton.

Gordon Ingraham will attend Mount Royal College in Calgary.

Melvin Beagle, Roy King, Bob DeWitt and Bill Steiner will attend Oids Agricultural school.

Norman DeWitt will attend Western Canada High.

School re-opened last Monday with a new teaching staff. They are Mr. S. Stamm, grades 11 and 12; Mr. Miklos, grades 9 and 10; Mr. Fluter, grades 7 and 8; Miss Shane, grades 5 and 6; Miss Amy, grades 3 and 4; Mrs. Miklos, grades 1 and 2. We wish them much suc-

cess and welcome them into this community.

Mr. and Mrs. Jerry Jacques visited at the home of Mr. and Mrs. Ray Gaetz for a few days.

Mr. and Mrs. C. Christie and Mr. and Mrs. Glen Strong were weekend visitors at the home of Mr. and Mrs. N. Ekeland.

Friends of Mr. and Mrs. Vern Cawley will be pleased to hear of the arrival of their son, Sept. 14, in the Innisfail hospital.

Mr. and Mrs. W. McCutcheon (nee Olga Ogoloff) are proud parents of a daughter.

On Aug. 30 the Junior F.U.A. met at Hayes for their regular meeting and election of officers. Those elected were: President, Janus Norton; Vice-Pres., Melva Beckner; Secretary, Alan Ingraham; Treasurer, George Roberts.

The Arrowwood Booster Club met at the home of Mrs. Joyce House on Sept. 10 with a large membership in attendance. It was decided to sponsor a Turkey Shoot a play, and go ahead with plans for a Community Auction this fall.

Arlene Williams is now home, recuperating from an appendix operation in the Vulcan hospital.

Mr. and Mrs. Herb Kruger were visiting at the home of Mr. and Mrs. Jay Beagle on Sunday.

Mr. and Mrs. Fred Brown have moved into the new house just built by Mr. Ingraham. Mr. and Mrs. Bendickson have moved into the house formerly occupied by Browns. Mr. Bendickson is second man at the Pool Elevator.

Mr. and Mrs. Jae Stevens and boys motored to Moose last week end to visit relatives there.

L.-Cpl. Chester Beagle, R.C.E.M. E., has arrived in Calgary, after being flown there in a hospital plane from Korea. He is now in the Colonel Belcher hospital undergoing treatment.

Mrs. Keith Cochrane and John-nw flew to Rochester on Tuesday, where Johnny will undergo an operation. Mrs. Cochrane's mother, Mrs. Swartz, from New York, will meet them there.

We are sorry to hear that Norma McCauley (House) lost the second son of twins, born July 19, in New Jersey.

MOSSLEIGH

The Mossleigh Ladies' Community Club held their monthly meeting last week with a good attendance. They are planning to raffie a cedar chest filled to the brim in the near future. The proceeds are to go towards the building fund of the hall.

The Go-Getters Garden Club held their annual fall achievement program on the 28th of August, which was a big success. Miss Frasier of the Department of Agriculture accompanied Miss Mewha D.H.E. to the program, also Miss D. Dibney and they were quite pleased with the entertainment the girls gave.

School started on Sept. 8 with Mr. Buffam as principal, Miss L. Hayes Jr. High teacher, Miss Fath, Miss Hammer and Miss Thompson on the teaching staff.

Harvest is in full swing now when weather permits and a number of farmers are combining.

Mr. and Mrs. Hagedorn have had as guest, Mr. Hagedorn's brother Fred from Ontario for the past week.

The oil well derrick was moved away last week and the crew have left for Fort St. John. Our well turned out to be a dry hole.

Blind Creek-Mossleigh W.A.

The September meeting of the Blind Creek-Mossleigh W.A. was held at the home of Mrs. W. Hagedorn with a good attendance. Mrs. Hay read the devotional. It was decided to have a chicken supper and apron sale early in November. The October meeting will be held in the church and roll call will be a donation of fruit or vegetables for the Junior Red Cross Hospital.

"TOP PERFORMERS"
...on *any* job!

Regardless of what your hauling need may be, Chevrolet trucks are engineered to give you top performance in every way.

Let's look at power! Chevrolet gives you four great Valve-in-Head engines to choose from — the 92 HP Thriftmaster, 105 HP Loadmaster, 114 HP Torquemaster and the mighty 120 HP Workmaster. Each is "top" in its class for rugged, economical power.

Let's look at features! Chevrolet trucks offer you every feature you need to carry the load and haul the load safely, dependably and economically. Frames, springs, axles, recirculating ball steering and transmissions are engineered and built to unsurpassed standards of excellence.

Above all, let's look at value! Check the comparative values of Chevrolet trucks and you'll see for yourself why Chevrolet gives you more for your money. That's why more truck users buy these "top performers" than any other make!

District News

BERRYWATER

At the noon hour on Sept. 22 what could have been a serious fire on the Tom Webber Jr. farm was checked by Mr. and Mrs. Pete Wills noticing it and summoning help through Mr. Evan Beechman telephone agent at Milo. A large crowd responded and the fire was soon put out. It had burned ten acres of stubble and was close to a granary of wheat. It is believed to have been started by a spark from the exhaust of a truck.

Mrs. Tom Webber Jr. and Mrs. W. B. McIntyre were Lethbridge visitors last Tuesday.

Mr. and Mrs. D. B. Simms went to Calgary on Saturday and then on to Delia on Sunday to the funeral of a friend. They returned home on Monday.

Mrs. Leslie Richardson has recovered from another bad attack of the flu.

Mrs. Ernie Lind and her daughter Luella were visiting at the D. B. Smith home last week.

Amongst those entering University this year are two young people of this district, Miss Anne Oldfield, entering the faculty of education at the Calgary branch of the University of Alberta, and Ian Smith entering the faculty of Arts and Science, also at the Calgary branch of the University of Alberta.

One gets a most inspiring view these nights from the top of Bill Sharpe's hill looking south and seeing the lights of all the combines and trucks at work that are part of those at work harvesting Canada's largest wheat crop. Not knowing differently, one might imagine they were the lights of a large city.

ENSIGN

Miss Lois Kennedy of Calgary was a weekend visitor at her home here.

Friends in the district were sorry to hear that Archie McIntyre was a patient in the local hospital.

Mr. and Mrs. F. Oakes and family left the district last week to make their home in Armada, where Mrs. Oakes has accepted a position as teacher at the Armada school.

Visitors the past week at the Bill Turley home were Mr. and Mrs. Tom Vogel of Seattle, Wash. and Mrs. Turley and Betty Lou of Calgary.

Mr. and Mrs. Harry Brown Jr. of Calgary and Mr. and Mrs. Harry Brown of Okotoks were Sunday visitors in the district.

Mrs. Doug Looze and baby of Magrath are visiting at the home of her parents, Mr. and Mrs. B. Brown.

KIRKCALDY

Friends of Mrs. Donald MacKay are sorry to hear that she is a patient in the Vulcan hospital. A speedy recovery is wished her.

Mr. and Mrs. Sturgis Davis are the owners of a 1952 Chevrolet car.

Darrel Maisey of Ensign spent the weekend at his home.

Donald Mallory and Doug Wilson were business visitors to Calgary last week.

Mr. and Mrs. William Hummel and baby were visitors to Nobleford on Sunday.

Attending High School this year in Vulcan from Kirkcaldy are Betty Hollister, Ralph Gardiner and Paul Ewashen. Connie Gardiner is attending Vulcan public school.

Mr. and Mrs. E. Brookes and family of Fort Macleod were Sunday guests at the home of Mrs. Brookes' brother and sister-in-law, Mr. and Mrs. Joe Main.

It is reported that one of the Kirkcaldy elevator agents has graduated (?) as a gun inspector and has completed his initial inspection.

LOMOND

Miss Lillian Armstrong spent the weekend at the home of her parents, Mr. and Mrs. Earl Armstrong.

Cpl. Chris Nelson of the R.C.A.F. and his wife and daughter from Winnipeg, recently spent two weeks with his family, Mr. and Mrs. A. Neilson of Lomond.

Dinner guests at the home of Mr. and Mrs. Joe Soper last week were Ray Lee of Taber, P. MacBeth of Hanna and Stan Cherkas of Lomond.

Mrs. Clifford Booth spent several days in Taber recently.

Miss Arlene Booth and Miss Marlene Root both of whom are attending school in Taber were weekend visitors in Lomond and district.

The September meeting of the Birthday Club was held at the home of Mrs. Elmer Hamm. Nine members and three visitors were present. All enjoyed a very pleasant afternoon.

The first Guild meeting since the holidays was held at the home of Mrs. Phil Chapman on Thursday, Sept. 22. There will be a new clergyman for the St. John's Anglican Church, Rev. Reuss. Plans were made to have the church

cleaned. The next meeting will be held at the home of Mrs. Harry Asseltine, Oct. 16.

Harvest is in full swing in this district. Many of the farmers are nearly through. The wheat has to be left in piles in the fields as there is not enough elevator space and cars seem very scarce. Ducks are doing a lot of damage, moving from one farm to another.

Sunday School was held in the St. John's Church on Sunday, Sept. 20 and will be each Sunday now. The teachers are Mrs. H. Caufield, Mrs. Harold Koch and Miss Gail Spaeth. The teachers plan to raffie a food hamper to raise funds for the Sunday School. Tickets are now on sale. The hamper is on display in Frost's Store.

There was a large attendance at the Western Show and Dance held in Lomond on Friday, Sept. 19.

MAJORVILLE

He's here at last! Mr. Kilowatt arrived in a number of yards in Majorville at the end of the week to take over some of the chores. To those who are enjoying electricity on the farm for the first time, we know it is a special thrill and joy. It does away with the eternal cleaning and preparing lamps for nightfall in winter, not to mention the ever present danger of overturned lamps where there are children. "Sour grapes" tells us there will be power breakdowns when we least expect them, but who hasn't had the Coleman light act up the evening you had company for supper. Windchargers have been known to topple down and lamps require attention, very often when the menfolk are too busy to fix it. So a special welcome to Calgary Power and a hearty thank you to Mr. Black who so patiently helped us with some of the problems involved.

Bob Prentice is home from London, Ont., R.C.A.F. Station on a 44 days special harvest leave.

Cliff Clarke of Calgary has been driving the grain truck for Miles Clemmons. Cliff's dad homesteaded and still owns the farm in East Majorville but this is Cliff's first try at farming and he thinks hauling grain from the combine is fun.

Although only 20 inches of rain fell on Friday it was enough to stop combining for a few days. Harvesting is progressing very well. Some operators are finished and another good week should see the end for many others. Grades are running No. 2 but some No. 1 is also being harvested. Yields are 35 to 45 for summerfallow and 20 to 25 for stubble. There has been little hail damage and it has been one of the few frost-free falls remembered.

Mrs. H. Beattie and family of Calgary were overnight guests at the home of the former's brother and sister-in-law, Mr. and Mrs. Bartsch.

Hank Borschers of Enchant is combining for Geo. Heather. Mrs. Heather's sister, Mrs. H. Orsten, accompanied him for a visit and Mrs. Borschers is staying with her aunt for the duration of harvest.

Mr. and Mrs. Arie Vooyos are here from Vancouver visiting with their family. Mrs. Vooyos is looking after Gilbert's household while his wife is in the hospital.

The last church service of the season held in Liberty School on Sunday evening took the form of a harvest thanksgiving. The school was tastefully decorated with sheaves of grain and flowers and vegetables from the gardens. At a meeting after the service a board was elected for this district, officers being: Chairman, Irvin Sukut; and Secretary-treas, Mrs. Bennett Dew.

EXTRA TIME AT BREAKFAST BETTER THAN FORTY WINKS

If you can manage to be reasonable about it so early in the morning, observes "Health" magazine, you may realize that the extra time spent at the breakfast table will do you more good than the last few minutes in bed.

"It's a matter of scientific record that a good breakfast will make you feel more on the bit, less easily tired," says the publication. "And this is true of both men and women, regardless of the work they do, be it mental or physical."

By a good breakfast, the magazine means a moderate, balanced breakfast—"somewhere between the starving stenographer's coffee and cigarette and the old-time farm breakfast that ran all the way from fried potatoes to pie."

The medium-size breakfast recommended by nutritionists includes fresh fruit, a whole grain cereal, milk, whole grain bread or toast, and a beverage such as coffee if desired. Such a meal provides the important B-vitamins, minerals, and protein which are essential in the first meal of the day.

"There is no need to resort to food fads and expensive preparations to achieve a well balanced diet," declares HEALTH. "The

fruit, cereal, milk, bread and butter breakfast keeps the blood sugar level high enough to prevent a pre-lunch energy slump. A low blood sugar level often results in light headedness and fatigue, which in turn are the temptation that leads to undesirable between-meal snack habits."

A railway to tap the iron ore deposits of Ungava, due to be producing in 1954, will cost \$75,000,-

Brief Items of Local Interest

Recent business visitors to Vulcan from Calgary included Bob and Fred Simington and George Monkman.

Friends of Mr. and Mrs. C. Van Overbeek, former residents of the Vulcan district, will be pleased to learn that they are now the proud parents of a daughter, Marian, born at the Memorial hospital, St. Thomas, Ont., on Aug. 29.

Mr. and Mrs. J. M. Hill were Calgary visitors last week.

Sunday guests at the home of Mr. and Mrs. Ken Nickerson were Mr. and Mrs. George Schmidt, Ernest Schmidt and Mr. and Mrs. M. F. Harris and son Bobby, all of Raymond.

The six little McMasters girls, daughters of Mr. and Mrs. Dale McMasters, have at last received what they have waited for so long, in the arrival of a bouncing 9½ lb. baby brother, born in High River hospital, Saturday, Sept. 20—a brother for Deanna, Lorna and Linda (twins), Wendy, Leslie Ann and Merna. Congratulations.

W. A. Schenck has returned to look after his farm interests after spending the past few months in California.

Paul Somerville, who has been visiting with his parents here in Vulcan and with his brother and sister-in-law, Mr. and Mrs. R. A. Somerville, at the farm, has now returned to Chapel Hill, N. Carolina to resume his studies at the University of Chapel Hill. Three other students, Mel Podell, Otle Hoke and Tom Lloyd also of Chapel Hill, accompanied him on the trip to Canada and the U.S.A.

Mr. and Mrs. Don M. Jantzie have returned to Empress after a three week vacation at the home of the former's parents, Mr. and Mrs. D. O. Jantzie. Don is employed with Seismograph Service Corporation as chief interpreter and is a present working in the Empress district.

Mrs. A. Grove and daughter of Lethbridge were recent visitors at the home of Mr. and Mrs. P. N. Simpson.

Mr. and Mrs. Louis Posey of Cusick, Wash., and Mrs. William Heslop of Nanton were visitors at the W. M. Peters home on Monday.

B. J. S. Sharp of Calgary, Optometrist, will be at Mitchell's Drug Store, Vulcan, on Saturday, Oct. 4 from 10 a.m. to 5 p.m.

Mr. and Mrs. P. N. Simpson were Lethbridge visitors on Sunday.
